

Arm-held, the wearable ultrasound

MyLabOne

PRELIMINARY

Designed around You

Just think to take your ultrasound device and wear it

"I need a **wearable** device"

MyLabOne innovative design brings ultrasound to the point-of-care. Arm-held solution: steadily fix the ultrasound device to the user's arm, providing a comfortable and stable setting, able to face any working condition, even the most critical ones.

CARDIOLOGY

RADIOLOGY

"I need a **fast** and **efficient** device"

Emergency and critical care can require very high standards of technology: time and reliability of diagnosis are crucial factors. MyLabOne integrates all these characteristics ensuring a long working time with battery.

EMERGENCY

"I need Extended performance"

MyLabOne performance is further enhanced when it is located on the dedicated desk stand. It offers an optimal positioning when the system is on a desk and ensures the correct battery recharge. Additional ports for data export and video output are available to extend MyLab One performance.

- ✓ Optimal positioning
- ✓ Battery recharge
- ✓ Additional Export Output

RHEUMA

"I need an Ergonomic standing unit"

MyLabOne offers the highest standard of ergonomics, both for the system itself and for the wide range of accessories. The advanced roll stand has been developed to satisfy the most demanding requests. Premium performance, ease of use and user comfort at the same time.

- ✓ Height Adjustment
- ✓ Articulated Arm Positioning
- ✓ Additional Battery Package

VASCULAR

"I need a Versatile system"

MyLabOne has no limits in the use for generic and specific applications. Some of them may require particular system settings in which comfort and ergonomics have to be ensured anyway.

- ✓ Monitor orientation
- ✓ Printer support
- ✓ Insulated power supply

OB-GYN

"I need Reliable solution"

Any specific detail has been considered in the MyLab One product concept. Its main characteristics allow the system to be placed in any environment, always providing easy, fast and reliable access to diagnosis.
